

Swiss Voice over IP Pioneer Announces New Collaboration

peoplefone Adopts the Web Conferencing Solution Veeting Rooms

Zürich, September 15, 2015. The internationally successful VoIP provider peoplefone AG announced today the launch of an innovative web conferencing solution for its clients: peoplefone MEET. For this service, the Swiss telecommunications provider is partnering with another Swiss company, Veeting Rooms. peoplefone MEET, a white-label version of Veeting Rooms, is hosted on the VoIP provider's own servers. It is available as an inexpensive monthly and yearly subscription. WebRTC technology with encrypted direct audio and video connections ensures that conference participants enjoy optimal privacy, without having to create logins or install any special software. This makes web meetings with peoplefone as easy as a phone call or a hallway conversation.

And peoplefone MEET is more than simply a communications channel: It provides clients with fully equipped conference rooms.

Comprehensive Functionality for Business Meetings

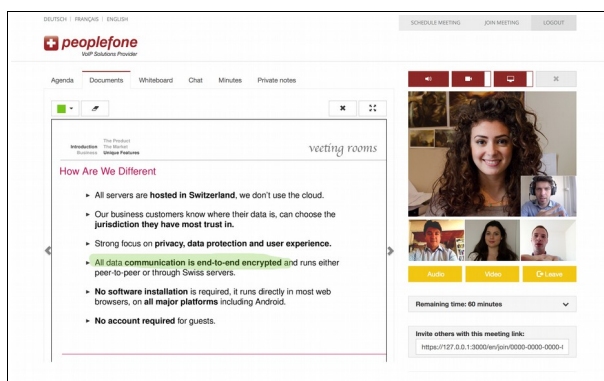

The peoplefone MEET experience starts with the setting of an agenda during the planning phase and extends all the way to the automatic distribution of minutes. During the meeting, participants can use the whiteboard, text chat in real time, take notes, exchange documents and share the screen. The user-friendly, intuitive interface makes these tasks easy.

High Quality Enhancement of peoplefone Services

Christophe Beaud
CEO peoplefone AG

In a recent ranking of telecommunications providers by the Swiss business magazine Bilanz, peoplefone once again made first place in the fixed network/VoIP category. peoplefone founder and CEO Christophe Beaud credits his company's strategic focus on quality with the success: "Over the course of the last decade, we have established ourselves as a pioneer for VoIP. We carefully select all our partners, and the innovative and mature offering of Veeting Rooms convinced us on all fronts. Our more than 4,000 business clients will enjoy peoplefone MEET especially for its ease of use."

Veeting Rooms Further Strengthens Its Position in the Telecommunications Sector

Launched in 2014, the web conferencing solution Veeting Rooms quickly established itself in the German speaking markets. One of the service's core strengths is its flexibility. Fabian Bernhard, the founder and CEO of Veeting AG, says: "We offer direct Veeting subscriptions, attractive white-label versions and full integration into a company's existing infrastructure. This makes us especially appealing for telecommunications providers. We are thrilled to partner with peoplefone, a very strong contender in this sector."

Fabian Bernhard
CEO Veeting AG

About peoplefone AG

Founded in Zurich in 2005, the peoplefone Group has become a leading provider of VoIP. On a daily basis, more than 50,000 business and individual clients make phone calls using peoplefone. The peoplefone Group has subsidiaries in six European countries: Switzerland, Germany, Austria, Poland, Slovakia and Lithuania. A couple of factors set peoplefone apart. They include a strong team in Switzerland that provides technology and development, the engagement of every staff member in customer service, and close alliances with systems integrators.

About Veeting AG

Veeting Rooms is an innovative all-around solution for web-based conferences. Launched in 2014, the Swiss service provides virtual meeting rooms that offer all the tools necessary for efficient conferences, including online presentations, data exchange, whiteboards, shared screens and minutes. Thanks to our WebRTC technology, these comprehensive functions are just as userfriendly as the access to Veeting Rooms. Encrypted, highly secure audio and videoconferences are accessed directly in the browser and without the previous installation of software. Available in English and German, the service is compatible with all major PC operating systems as well as with Android for mobile. Veeting Rooms offers its clients great flexibility. The service is available on a subscription basis or in form of prepaid packages, and we provide white-labeling as well as full integration into existing software environments. No matter how — with Veeting Rooms, virtual meetings are as easy as a phone call.
